

Key Stage: 5

Subject: PHYSICAL EDUCATION

Aims of the subject:

- AS Level in physical education will equip learners with both the depth and breadth of knowledge, understanding and skills relating to scientific, socio-cultural and practical aspects of physical education. This requires them to:
 - develop theoretical knowledge and understanding of the factors that underpin physical activity and sport and use this knowledge to improve performance
 - understand how physiological and psychological states affect performance
 - understand the key socio-cultural factors that influence people’s involvement in physical activity and sport
 - understand the role of technology in physical activity and sport
 - refine their ability to perform effectively in physical activity and sport by developing skills and techniques and selecting and using tactics, strategies and/or compositional ideas
 - develop their ability to analyse and evaluate to improve performance
 - understand the contribution which physical activity makes to health and fitness
 - improve as effective and independent learners and as critical and reflective thinkers with curious and enquiring minds.
