

GCSE Biology

Y10 NEWSLETTER MAY 2023

DEAR PARENTS/GUARDIANS

I am writing to you ahead of the upcoming Mock exam period for Year 10 to provide you with details of the Biology content, and methods of revision. Dependent upon which class your child is in, they will sit 1 of 3 possible papers for Biology. Please see the box to the right.

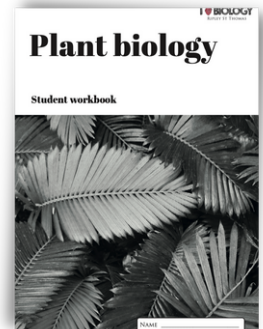

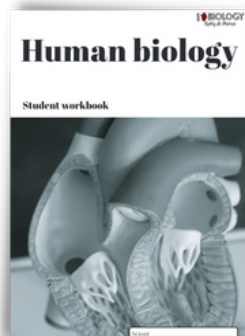

The final GCSE consists of x2 papers, pupils at this stage in Year 10 have covered the content of Paper 1 and therefore will be completing a Paper 1 mock exam.

Your child has been provided a revision checklist, which I have also attached for your reference. They have also been set a comprehensive Firefly task detailing each topic area and resources to revise with.

The best method of revision is to practice past papers, please see the link to the right (and on the revision checklist) to access these. It is important pupils practice the relevant papers for the course they are following, so please do highlight this with them. We hope your child is enjoying Biology, as ever if you have any questions please get in touch via Parentline.
