Lancashire Libraries

Week Commencing 24 June

An epidemic is sweeping the country.
You are among the infected.

There is no cure, and you cannot be
permitted to infect others.

You are now under quarantine.

The very few of the infected who
survive are dangerous and will be
taken into the custody of the army.

Young runaway Callie survived the
disease, but not the so-called
treatment.

Her brother Kai is still looking for her.
And his new friend Shay may hold the
key to uncovering what truly
happened.
